

Security Electronic Key Box Smart KeySafe

KEYSAFE is a security keybox, managed and controlled with MicroaXs's Rent&Pass system. Designed for types of accommodation where the door lock is not to be modified, KEYSAFE is easily installed hanging from the door knob or attached to the wall. Designed for tourist apartments, small hotels without 24-hour reception, aparthotels and estate agents, the operation of KEYSAFE simplifies management for owners and improves the experience for guests.

Owner

The owner deposits the keys or MiFare card inside the KEYSAFE and send the guest a pin code and/or Electronic Key for opening via Bluetooth using the Rent&Pass app.

Guest

The guest receives the PIN code and/or Electronic Key on its smartphone and, upon arrival at the accommodation, opens the KEYSAFE and remove the key or card the owner has left.

Security

- Electronic Key and Code with validity adapted to the reservation type: permanent, temporary, cyclical, by time slot or single opening
- Opening alerts configurable by the administrator.
- Anti-spy code, supports up to 10 previous and 10 subsequent digits.
